SURYA FOUNDATION

DOOR OF HOPE

Introduction to Foundation

A life is synonym of Hope, a hope that revives the breath of an individual, and the breath could be in any form. It may be human being, animals, trees, birds etc. without breath a life never survives. We as a warrior from Surya foundation did realize that, we as a responsible citizen of this country must engage ourselves to enhance the lives of people living next to us. Though, we realized that it will require us to put in our great efforts, efforts that will keep us sweating in cold December. But we decided to walk on path of humanity, a path of love and happiness in everyone's life.

AIM

Our AIM is to **“Create happiness in society of future”**. As truthful effort in right direction gives the path of success and we strongly believe in creating happiness for a strong and healthy nation. We as a team at Surya Foundation started working with a team of mere 7 people in October 2016 and welcomed more volunteers in days ahead and now we are a team of 50+ members within a short span of time with 200+ student volunteers. We are growing every day, everywhere in everyone's life, we are creating happiness in lives, we are building up hopes, and we are building the trust in everyone's heart that we are always along at the time of need.

Vision

A strong foundation is the base of an organization and it is very well learnt by our Dinesh D. Sharma (President) and Shubham R. Vishwakarma (Vice-President) that, to reach at the highest peak one needs to put his heart and soul and very well conveyed to the team of Surya Foundation that our only vision is to **‘Reach out to people, understand their life, avail them the health benefits that governments provide, walk with them to tackle all the hurdles and provide financial support for medical aid’**. We very well understood that the path we have chosen is one of the toughest one however we are made of rocks and act like a warrior when it is matter of someone's right to live with dignity.

Community Support

Surya Foundation enjoys the community support from the very beginning. We are a collaboration of our core team members, volunteers, government officials, students, IT Professionals, Traders, Doctors (Hospitals) etc. We have also been helping IT Professionals in their CSR activities.

Our Success Factors

Government Health Schemes & Hospitals Though, we are in ocean of health industry. We are stepping ahead steadily and strongly. We identify the needy and look for best possible health benefit that government provides and we connect them to relevant hospitals or officials who help us make it easy to proceed with. At times we directly approach the hospitals and we are provided with all the help and support required to benefit the needy. Also, the harsh reality of real world is far tougher than we expect. We say this because there are situations where none of the tools help us to move ahead. And then we connect with our partners, IT firms, Fund Raising teams for financial support and take the financial factor in our hand and provide help to the needy ones.

Funding Support

We have our very well designed FRU (Fund Raising Unit) which helps us to deal with the situations where none of our predefined health model helps us. Then, we approach our FRU team and they provide the financial support to cover the expenses incurred during/after medical treatment of an individual/patient. We encourage people for smallest contribution they can, starting from Rs: 10/- to Rs: 100000/-, with all digital payment options/cash. With physical/online receipt for donation made to us.

Workflow

1. **Accepting the case:** The first step in the process of workflow is to accepting the cases. By this organisation will be enable to know about what we has to provide and support, but is should be kept in mind that the case should not be unmanageable in nature and should base on the policies of the organization.
2. **Conducting Managerial Meeting:** The second step in the process of workflow is to conducting managerial meeting. The managerial meeting should be conducted within 3 days of case acceptance. Quorum for such meeting shall be 3/5th of the members.
3. **Defining the disease:** The disease should be very clear in the mind of the managing committee as this will lead to the clarity of the disease.
4. **Review of Reports and Statements:** Review of reports and statements is an important stage of organisational structure. In this stage all medical reports, relating documents and statements were reviews and analyses.
5. **Defining amount of help for Treatment:** As the cost of treatment is already decided by the Doctor/Hospital. But in Surya Foundation, committee member will decide amount of treatment that organisation can grant. The amount of grant is decided after hospital visit, verification through hospital, patient, family's income relating documents and criteria and policies if the organization.
6. **Primary solution for grant:** The primary solution for treatment grant is funds available in the organization.
7. **Search for alternatives Solution:** If lack of availability of funds arises in the organization, then organisation will look forward for alternatives i.e. Government Grants, Other trusts, Corporates, Crowd Funding, etc.
8. **Gather data about alternatives:** In this step of workflow, organisation will search for alternatives for medical treatment grants and gathering information about available option with all possibilities.

9. **Selecting the Solution:** This is final stage of workflow, in this organisation select the best solution for giving medical treatment grant.

10.Saves the Life

Future project

Surya Foundation, we believe that if development is to be done in the country, then education and treatment should be made free in the country. In today's time, a large part of the income of a normal person goes into education and treatment. This has a huge impact on the progress of the country. Surya Foundation is marching ahead with a beautiful dream in which every person in the country gets free education and treatment.

1. Hospital for free

2. Library for all
